Skills

ReactJS | Redux | NextJS | JavaScript | TypeScript | Html & CSS | Tailwind | Java | NodeJS | Data Structure & Algorithm | Git

Work Experience

Wiz Freight | Frontend developer

Mar'22 - May'23

- Collaborated closely with product managers and UX designers to understand project requirements and business objectives, translating them into intuitive and visually appealing user interfaces.
- Designed UIs within frontend web frameworks, leveraging associated templates and tools to streamline development processes and achieve faster delivery times.
- **Sales Dashboard** : Built Sales Dashboard from scratch, Integrated chart libraries (such as Recharts) to create interactive visual representations of complex data sets. Implemented advanced data filtering options, empowering customers to segment data based on specific criteria.
 - *Impact* : Resulting in improved data relevance and a 40% reduction in information overload.
- **Enquiry Flow Validation** : Worked with Google map api and added validations to restrict customer for transport their bookings between two different countries, allowing customers to select precise door pickup and door delivery locations.
 - *Impact* : Resulting in a more intuitive and accurate booking experience.
- **Tech Involved** : ReactJS, NextJS, CSS, ChakraUI, Recharts, Axios, JavaScript and TypeScript.
